

Crystal Lake Street Division Management,

I am writing regarding the notification I received stating that Request W054983-101925 has been marked as "Completed" at 7:40:40 AM on 1/12/2026. While I appreciate the communication, I feel the need to formally contest this status. The requested work has not been performed; in fact, recent City activity has further obstructed the alley.

I would like to bring the following facts to your attention to ensure our records align:

- Misclassification of Work: On 1/12/2026 at 7:30 AM, a crew from Kendall Vegetation Services was on-site. However, after speaking with the crew, they confirmed they were hired by ComEd to trim brush encroaching on the power lines. This does not address my clearly stated request:
 - "Trim the overhanging tree limbs and ground brush throughout the alley to restore safe, vehicle-passable clearance."
- Lack of Action on Barricades: The northern barricades mentioned in the original request remain in place, continuing to obstruct the public right-of-way. This is clear evidence that the "Completed" status is inaccurate given my clearly stated request to:
 - "Remove the northern barricades to restore the alley's full public right-of-way access."
- Active Obstruction: Since this request was filed, City plow trucks have moved hard-pack gravel into piles at both ends of the alley, creating "gravel walls" that further prevent vehicle access. Far from being "completed," the alley is now less navigable than when my request was opened, as a result of the City's actions.

I have maintained a clear log of the alley's condition throughout the duration of this request. My documentation confirms that no work has been performed by the City to restore the navigable state of the alley to a public right-of-way. The images I share with you today were taken after the request's status was changed to "Completed".

I am operating in good faith as a neighbor and homeowner who values our public infrastructure. I am asking that the City re-open this request and dispatch a supervisor to meet with me on-site at a scheduled time where we can verify that the alley remains impassable.

My goal remains the same: the removal of the barricades and the clearing of ground-level overgrowth to restore the 16-foot clearance required for safe vehicle access. Due to the City's action creating a new issue - gravel walls hard packed to a cement-like structure, the levelling of these new obstructions seems a necessary addition to the initial request. If you contacted ComEd or Kendall to clear brush near powerlines I appreciate the action, but the resulting work by Kendall does not address either of the 2 points in the initial request.

I look forward to a corrected timeline for when these specific tasks will be addressed and a scheduled in-person, on-site visit with a supervisor.

Sincerely,

Jack Billimack

227 Illinois St
