Hello - thank you for reaching out.

I noticed, what may be considered an issue with your Public Records Center's messaging and actual request status. This request is labeled "In Progress", however the messaging system has mentioned "complet[ing] working on the request detailed below". Considering none of the two paragraphs in the initially submitted PDF and Description Field have garnered a response within this request's thread, and the request stated and signed off by John B Katkus has not been "completed", this indicates an inaccurate statement of this request's state made by the City.

Additionally, I've attached an image of the alley, which John needs updated in accordance with historic precedent, found in a continually hazardous state. This confirms the above request has not been completed. In accordance with prior requests requests involving the GLEN/SHERMAN alley (e.g. pothole work orders through the City's Streets Division), I look forward to the City helpfully responding to our(Jack's and John's) request.

Since I am unable to inform John on his request's status with the information provided to me, please keep John and myself updated with this important request's status.

Jack
